

Safwan Muhammed Shereef

Bangalore, IN | +91 9020822772 | safwanmshereef7@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience with tools like Docker, FastAPI, React, and PostgreSQL, specializing in full-stack development and scalable backend architectures. Combining a rigorous technical foundation with active enterprise experience, I possess a proven track record of designing secure, role-based REST APIs, implementing responsive frontends, and optimizing complex database schemas to reduce system latency. Backed by 6x Google Cloud infrastructure certifications and a highly analytical problem-solving mindset, I am dedicated to writing clean, maintainable code and collaborating cross-functionally to ship reliable software solutions.

PROFESSIONAL EXPERIENCE

Freshivores

Software Engineer Intern

Feb 2026 – Present

- Developed full-stack store operations portal with React frontend and FastAPI backend, supporting 50+ daily active internal users and implementing RBAC for secure access control.
- Built and maintained REST APIs with type-safe frontend integration; managed PostgreSQL database schemas and optimized complex SQL queries, reducing query latency by 15% and improving portal load times.
- Containerized applications using Docker for consistent development and deployment environments.
- Participated in code reviews, contributed to documentation, and debugged system issues.

Singularis Software Technologies

Python Developer Intern

Sep 2024 – Apr 2025

- Developed ETL automation scripts using Python, reducing manual data processing effort by 30%.
- Integrated systems for data extraction, transformation, and loading across CSV/Excel pipelines.

Techmaghi

AI & Computer Vision Intern

Apr 2023 – May 2023

- Designed and deployed software applications using TensorFlow and OpenCV.
- Managed system dependencies and optimized preprocessing pipelines, improving accuracy by 20%.

KEY PROJECTS

SRA Groups - Attendance & Management System | FastAPI, React Native, React, Firebase, Docker

- Developed full-stack web and mobile application with GPS geofencing and role-based access control.
- Integrated frontend with backend REST APIs; managed database operations and audit logging.

Hybrid RAG AI Assistant | Python, LangChain, FAISS, Gemini, Ollama, Streamlit

- Built full-stack AI application with dual-engine inference and vector search.
- Integrated multiple APIs (Gemini, Ollama) and managed system dependencies.

Zenturio Chatbot | Python, Google Gemini SDK, Tiktoken, SQLite, Streamlit

- Implemented persistent session management using SQLite database.
- Managed API keys, environment variables, and secure configurations.

CFTA - Carbon Footprint Tracking App | Android (Java), Laravel, ML Regression

- Managed SQLite database operations including data storage, retrieval, and user data validation.
- Built API endpoints and managed server-side logic.

NutriScan AI – Smart Health Companion | Python, Gemini Vision API, Computer Vision, Streamlit

- Integrated Gemini Vision API for real-time meal classification and automated nutrition logging.
- Built AI Chef module that generates personalized recipes from detected ingredients.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, SQL, HTML, CSS

Frontend: React, React Native, Next.js, Streamlit

Backend: FastAPI, Node.js, REST APIs, JWT

Databases: PostgreSQL, MySQL, SQLite, Firebase

Tools: Docker, Git, GitHub Actions, Postman

Cloud: Google Cloud Platform (6x certified)

Concepts: Data Structures & Algorithms, OOP, Database Design, RBAC, CI/CD, SDLCs

EDUCATION

College of Engineering Kidangoor, Kerala

B.Tech in Computer Science Engineering

Nov 2021 – June 2025

CERTIFICATIONS

- Google Cloud AI Infrastructure (6x certified)
- Ethical Hacking Associate
